14 PACKET SNIFFING USING RAW SOCKET

AIM:

To write a program using RAW sockets to capture and display network packets.

ALGORITHM:

1. Create a RAW socket.
2. Bind the socket to the network interface
3. Receive packets from the network.
4. Extract the IP header information.
5. Display the source IP, destination IP and protocol.
6. Continue capturing packets.

CODE:

```
import socket
s = socket.socket(socket.AF_INET, socket.
                  SOCK_RAW, socket.IPPROTO_
                                  IP)
s.bind(("0.0.0.0", 0))
s.setsockopt(socket.IPPROTO_IP,
             socket.IP_HDRINCL, 1)
print("Packet Sniffer started...")
while True:
    data, addr = s.recvfrom(65535)
```

```
print ("Packet received from:",
                    addr[0])
```

INPUT:

Network packets

OUTPUT:

packet sniffer started....
packet received from: 192.168.1.5
packet received from: 192.168.1.1
packet received from: 192.120.183.14

Result:

The RAW SOCKET SNIFFING PROGRAM was successfully implemented and network packets was captured and displayed.
