IMPLEMENT YOUR OWN PING PROGRAM

Aim:

To implement a ping program using python to check connectivity btw sources and destination host.

Algorithm:

1. Get destination IP address from user
2. send the request to destination
3. wait for reponse
4. Calculate the reponse time
5. Display whether the host is reachable
6. Repeat the process for few requests.

CODE:

```
import os
import time
host = input("Enter host:")
for i in range(4):
    start = time.time()
    result = os.system("ping -n 1 " + host
                       + " > null")
    end = time.time()
    if result == 0:
        print("Reply from", host, "time=", round(
            (end - start) * 1000, 2), "ms")
```

```
else:
    print ("Request timed out")
time.sleep(1)
```

INPUT:

Enter host: 127.0.0.1

OUTPUT:

Reply from 127.0.0.1 time=1.23ms
Reply from 127.0.0.1 time = 0.98ms

Result:

The PING program was successfully studied and implemented.
